Product Update

Beginning in July, teachers will be able to assign on level objectives outside of a student's study plan for the purposes of blended learning or targeted review. Once the added objectives are completed the student will return directly to the Ascend Math assigned study plan. This is one of the most requested features ever and we are proud to provide it to you for next school year!

Tip of the Month

School admins: When preparing for next school year, take advantage of the new Download Roster feature in Ascend. You'll find the Download Roster button located on the menu bar in the top right corner along with the Logout and Help buttons.

Partner School of the Month

Congratulations to Riverview Middle School, our Partner School of the Month. Riverview students completed a total of more than 1,200 objectives in Ascend Math, averaging 31 objectives mastered for each student. More than 56% gained one or more grade levels in Ascend Math with 10% gaining two levels.

"Our students who were actively engaged with the program showed positive growth with their trend lines on STAR assessments," writes Jon Lantz of Riverview Middle School. "The students enjoyed the fact that they were only asked to show mastery on concepts they didn't know instead of all standards within a level. Some students were in a competition to see how many mountains they could climb. In our brief pilot I was able to see the benefits of this program for our students with gaps in their math knowledge."

Schedule your Fall Training Now!

Contact your local Ascend Math representative or call 877-843-0277 to review training options.

Changing Schools?

Don't forget to take Ascend Math with you! Contact your local Ascend Math representative or call 877-843-0277 to make arrangements.
