FOR IMMEDIATE RELEASE

Ascend Education Announces New Problem Set Generator to Support Student Success

Shreveport, LA – October 14, 2025 – Ascend Education is excited to announce the release of its new **Problem Set Generator**, a powerful tool designed to provide teachers with greater flexibility and students with targeted practice opportunities.

This new feature allows teachers to easily **print customized problem sets** to give students additional practice beyond the problems already available in **Ascend Math**. With the Problem Set Generator, teachers can:

- **Search by topic or standard** to align with classroom needs.
- **Select the number of problems** included in each set.
- **Adjust the number of distractors** to meet IEP goals and differentiated learning needs.

The Problem Set Generator has already undergone a beta release, during which Ascend Math educators provided overwhelmingly positive feedback. Teachers reported that the tool offered an effective way to deliver additional, structured support to students requiring intervention.

“This tool was built with teachers in mind,” said Kevin Briley, CEO, Ascend Education. “By giving educators the ability to tailor problem sets, we’re helping them provide more intentional practice for Tier 2 and Tier 3 students who need it most.”

The full release of the Problem Set Generator marks another step in Ascend Education’s commitment to equipping teachers with the resources they need to accelerate math growth for all learners.

The Problem Set Generator is available now for all Ascend Math users. For more information, visit ascendmath.com or contact info@ascendmath.com.

About Ascend Math®

Ascend Math® is personalized online math instruction that provides each student with a unique study path through skill gaps at each level. Individual study plans are prescriptive, adaptive and automatically assigned.

Ascend Math® has demonstrated results that enable students to grow two or more grade levels in one semester. This research-based program is an online individualized instructional resource which identifies skill gaps, prescribes targeted instruction and motivates students to succeed. Schools may use Ascend Math as a Core Math Curriculum or a Supplemental Math Curriculum to target the needs of special populations including Tier II and Tier III Interventions, Special Ed, High Ability, Algebra Readiness, Acceleration and Credit Recovery.

Ascend's fully automated solution reduces the demands on teachers' time. Ascend's approach supports improved math achievement regardless of students' reading levels. This resource provides important support for ELL and students with special needs using video, audio, and multimedia components. Ascend's real-time reports will assist in simplifying progress monitoring and helping meet Federal audit guidelines.

Study plans align by grade level to rigorous state standards. Instruction is delivered in a logical math sequence and students can progress at their own pace and track their own progress and success. Ascend Math is currently used by hundreds of schools and districts serving tens of thousands of students throughout the U.S. and Canada. Visit www.ascendmath.com
